BICYCLE TIRE

2026

ABOUT INNOVA

Innova Rubber Co., Ltd. was founded in 1995, headquarters in Changhua, Taiwan; factories at Taiwan and China, mainly producing bicycle tires; wheelchair tires; baby stroller tires and all kinds of leisure race tires such as ATV tires; golf cart tires; motocross tires and others.

The company aims to focus on the creation of innovation, the pursuit of quality and customer satisfaction.

Innova has an excellent R&D team and strong production bases in Taiwan and China. Our factories are all awarded ISO-9001 certification to ensure the production of the best tires/tubes and to deliver the best quality to the final consumers for the trust of customers.

Innova, pursuit of innovation is a never-ending effort, has developed a number of global patents including the new patterns, new tire structures, as well as new products.

We believe our constantly improvement in product quality and customer service will eventually make Innova become a household name synonymous with quality and value.

### Environmentally friendly energy use

The use of solar power generation equipment on the factory roof can generate approximately 4.3 million kilowatt-hours of power for self-use every year, thus reducing the use of other energy sources in China factory.

### Reduced gas emissions

INNOVA uses natural gas instead of heavy oil combustion, and the boiler carbon dioxide emissions can save 80 kg/ton per ton of steam in Taiwan and China factory.

### Restore a large number of trees and sustainable organisms

Actively restore trees in the factory area to reduce carbon dioxide emissions in China factory.

### EU New rules on deforestation

Innova will follow this rule and imported those natural rubber with the EUDR certificate for our European customers to meet the requirement of EU rule.

### Actively participate in social welfare activities

INNOVA donate scholarships for poor students, sponsor school bike teams, happy children's angel cycling activities, and organize bicycle races.

### Material recycling

INNOVA use recycled fishing nets to make tire casing + recycled carbon black + recycled rubber + carbon black-free formula in Taiwan and China factory .

### Energy-saving ventilation equipment

INNOVA uses environmentally friendly ventilation equipment for rest and standby, which can save 17% of electricity every month in Taiwan and China factory .

### Production equipment energy-saving system

Extruders, air compressors, and other related equipment in the factory all use variable frequency voltage systems, which can save about 50% of electricity every month in Taiwan and China factory.

### Reduce petroleum materials

Soy bean oil to replace the existing petroleum process oil + silica powder to replace carbon black formula in Taiwan and China factory .

### Corporate Governance

The business philosophy and company culture are clear, and the operation and governance are transparent. Two operating meetings, board meetings and one shareholders meeting are held every year. The company also formulates short, medium and long-term development plans in line with various international management indicators and market needs.

# LSR-HP TIRE

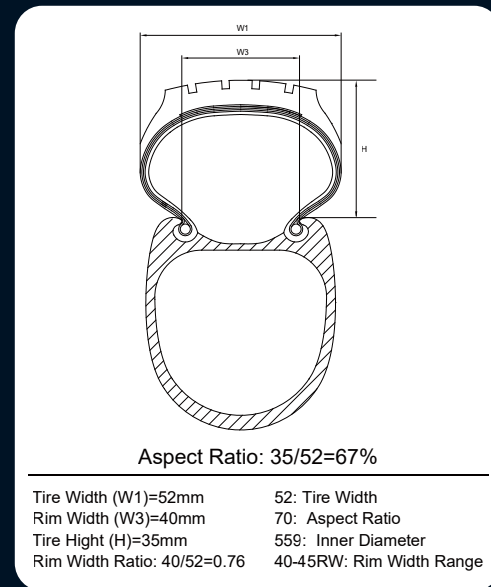

Low profile radial tire with wider rim

Patent pending

TAIPEI CYCLE  
d&i awards 2025

by ifc

- The LSR-HP tires is low profile radial tire to reach high performance and supple ride experience.
- Like car tires, the aspect ratio is lower for better performance and the specified rim width range are designed to match the performance.
- New size will be "tire width/aspect ratio-inner diameter rim width " 65/70-584 50-55RW & 52/70-559 40-45RW "

EX: " 52/70-559 40-45RW "

## INNOVA TPU TUBE TECHNOLOGY

Innova Creates Two Different Type Tpu Tubes:

- ★ SHEET TYPE IS FOR PLUS AND FAT TIRES
- ★ EXTRUSION TYPE FOR ROAD/GRAVEL/MOUNTAIN BIKE TIRES

# INNOVA-PRO TPU BICYCLE TUBE

TPU Tubes Provide Those Advantages Including:

- **LIGHTER WEIGHT:** 60% LIGHTER THAN BUTYL TUBE
- **SMALLER VOLUME:** 50% VOLUME OF BUTYL TUBE
- **BETTER ANTI-PUNCTURE:** 5 TIMES STRONGER AT THE SAME THICKNESS
- **BETTER AIR HOLDING:** 4 TIMES BETTER AT THE SAME THICKNESS
- **BETTER SAFETY:** 5 TIMES STROGER SPLICE STRENGTH
- **100% RECYCLE**

# CLASS

## TLR TUBELESS READY

TUBELESS READY tires can be used as regular tire with tube inside but also can be used as tubeless tire by adding sealant inside. Tubeless ready has similar function as UST tire but owns double functions of excellent puncture resistance and lighterweight for superior rolling as well as handling performance. Adding sealant is necessary.

## TEAM

TEAM is the most high end tires that Innova produces for competition. The feature of Team is designed by using 120 tpi casing with foldable Kevlar bead for most light weight and special tread compound gives highest performance tires.

## RACE

RACE tires is these excellent tire that Innova pro design for Race and final training for competition. By using 60 tpi casing with foldable Kevlar bead, this class owns the features of light weight and powerful performance.

## STANDARD

STANDARD tires is most economic tire with the rigid bead and 60tpi casing. It shows very even distribution of stress after inflation and gives pretty good uniformity as well as good tire life.

SNAKE BITE

The function of Anti Snake Bite is designed by adding strongest fillers in the bead area to prevent the snake bite. The weight is added but perfectly suitable for those Down Hill tires requesting to free from snake bite.

# CASING & BEAD

## FOLDING BEAD

**FOLDING BEAD**  
Innova uses DuPont™ Kevlar® yarn as the material of bead grommet. This high quality material provides the most light weight foldable tire for team and race class.

## 60 TPI

Nylon 66 fabric with 60 threads per inch(tpi) which is designed for the race and training version.

## 120 TPI

Nylon 66 fabric with 120 threads per inch(tpi) which is designed for the race and training version.

## 180 TPI

Nylon 66 fabric with 180 threads per inch(tpi) which is designed for the race and training version.

## HIGH PERFORMANCE ROAD TIRE

### GLIDE

- Strongest Anti-Puncture by HD Belt
- Longer life + high grip by high grip silica compound
- Smoother riding by glide pattern design

# MTB

## LOAM WIZARD

Designed for All Mountain and Enduro riding. On the uphill, the large center block provides improved climbing traction, and quick acceleration. The links between the center block makes the pattern block more stable under load and reduce squirming. The directional design on the tread allows for significant reductions in tire rolling resistance. The combination of aggressive arrangement of the blocks, open design and a simple V-slot located in the center and side blocks translate to direct and precise steering. It allow for a high efficient transfer of power to the ground while maintaining extreme durability.

# JAVELIN

Designed as a leading off-road road conditions and ultra-endurance tires. The unwavering traction of the shoulder knobs, and the super handling when going downhill. This is the preferred tyre for our entire endurance team of endurance racers due to its unmatched traction on off-camber trails. The interspersed central pattern blocks can bite into the dirt in any wet or dry terrain while providing stability at any speed. The block are arranged in a way to ensure effective mud clearance. It can also be used as a rear tire on loose, steep terrain for its strong braking traction. It can also be used as a front tire for its cornering capability.

# PODIUM

27.5x2.6 PODIUM For fast E-bikes, Innova has designed the special tire construction and compound. The premium compound offers the dependability of excellent grip & high mileages and the construction of Sport Guard 3.5mm & Side Guard provides the superior puncture protection. It was certified with ECE-R75 and approved for vehicles, up to 50 km/h. An all terrain pattern design with the tubeless ready construction. Aggressive outlook plus the design of small lines insert into each knob give the tire powerful performances in riding.

## EL CAMINO II

The smooth tread center can roll very quickly on paved road. The diamond shaped intermediate transition tread make sure this tire won't be stopped by any rough roads and long detours.

It allow for strong confidence in any road condition, providing a smooth riding experience, and maintaining good handling on unpredictable terrain with the square pattern of the tread shoulder. Suitable for riders who want to relax themselves without a destination , just for the pleasure of riding.

# EL CAMINO

For a gravel tire, you want a tire that is able to cover riding on variety of different surfaces and conditions. The tire should provide grip while rolling smoothly. This is exactly what the tire is able to do. You will find it to perform well on paved roads but it really shine on unpaved roads and gravel. Riding on dry conditions light trails is also a lot of fun. For slightly more muddy conditions the aggressive side knobs maintain the traction effectively. The smooth ride and good grip let you enjoy every meter of your commutes and rides.
